

The workshop will gather representatives from a range of Earth Science disciplines to focus on three topics of natural hazards that impact society:

- Hazards on active margins
- Hazards on passive margins
- Tropical cyclones in the geologic record

The scope is intentionally broad to explore the range of potential hazards projects that can be supported by the 2050 Science Framework.

The workshop will have the following goals:

- Outline questions in natural hazards that can be addressed with MSP drilling
- Identify field locations to examine those problems
- Develop three pre-proposals for MSP drilling

Organizing Committee: Hugh Daigle (Univ. of Texas at Austin), Joao Duarte (Univ. of Lisbon), Ake Fagereng (Cardiff Univ.), Raphael Paris (Univ. Clermont Auvergne), Patricia Persaud (Louisiana State Univ.)

Deadline for registration 15th April, 2022

Location: Instituto Dom Luiz, University of Lisbon

MagellanPlus Workshop

Mission-specific platform approaches to assessing natural hazards that impact society

Lisbon, Portugal | July 8–10, 2022

We expect a workshop of <50 participants with diverse expertise, and balance of genders and career-stages, and have secured support for accommodation for up to xx ECORD participants. Travel funds will be preferentially dedicated to early-career researchers (within 10 years of their terminal degree) and participants who can broaden the perspectives presented at the workshop.

To register please provide a brief motivation and a one-page CV to daigle@austin.utexas.edu. Also indicate if you would like to give an oral 10-minute presentation in one of the sessions.
