

ECORD Launches its new website!

After seven months of work, the ECORD Outreach and Education Task Force* and COSIWEB (www.cosiweb.fr), a French web design company, have successfully launched the new ECORD website on 19 September 2016.

The new website now incorporates the former ECORD, ESSAC and ESO websites under a single portal, and includes links to all other IODP websites.

We invite you to visit our new ECORD website at www.ecord.org!

The screenshot shows the ECORD website homepage. At the top is the ECORD logo and a navigation menu with links: ABOUT ECORD, EXPEDITIONS, SCIENCE, OUTREACH, EDUCATION, and RESOURCES. Below the navigation is a large banner image of a ship's deck over the ocean with the text "Unraveling Earth's history beneath the ocean floor". Underneath the banner, it states "The European Consortium for Ocean Research Drilling unites 17 countries and provides mission-specific platforms for IODP expeditions" and features the IODP logo. A central section highlights "Expedition 364: Chicxulub K-Pg Impact Crater" with a "Learn More" button. Below this are four statistics: 17 Countries, 7 Expeditions, 50% Young scientists, and 77 Drilled sites. At the bottom, there is a "LAST NEWS" section with three news items: "ECORD Facility Board – get on Board", "ECORD invites you to host a Lecture" (part of the Distinguished Lecture Programme 2016/2017), and "Live from the Chicxulub Impact Crater".
